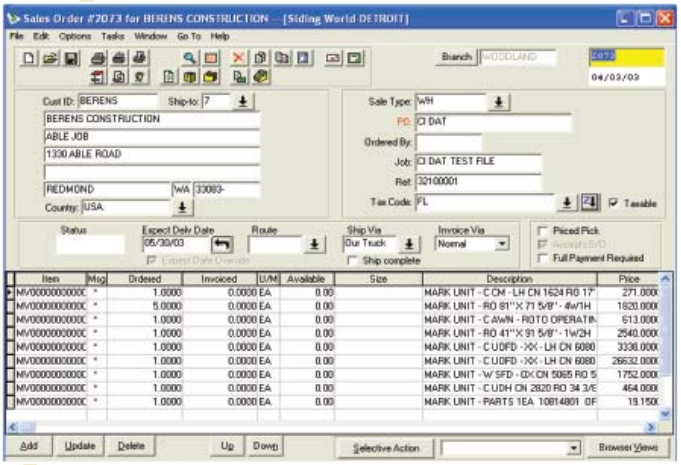
MILLWORK WINDOW INTERFACES

If you distribute the popular lines of windows and doors, you'll enjoy the advantages of millwork interfaces in Agility. Currently, Agility has interfaces to: Amsco, Andersen, Cascade, Ellison, Jeld-Wen, Kolbe, Loewen, Marvin, Silver Line, Simonton, and Windsor.



DMSi provides the leading business management, accounting software and e-commerce solutions in the industry. Our solutions fully integrate and automate your operational processes from order processing and inventory management to purchasing and back-office. We've designed each software module to address the unique requirements of the building products distribution industry, creating seamless workflow to maximize profitability and efficiency.

Automatically Create Orders

Window interfaces create orders containing several window units, complete with line items, instantly. Descriptions, prices, and reference numbers correlate to the original order to eliminate redundant keystrokes, errors, and missing line items. With Agility's centralized order information, you can proceed by sending immediate customer order acknowledgements.

Easily Manage Complex Orders

With specially ordered windows and doors on the rise, Agility offers added flexibility. Millwork interfaces in Agility keep inventory on-hand to a minimum, yet provide better service by issuing purchase orders directly from your manufacturers order acknowledgement for non-stock items. You'll notice a time-savings in every order, regardless of complexity.

Access Customer Information Easily

In order to help you fulfill orders faster and serve customers better, all credit, purchasing, receiving, shipping and billing ordering information is readily available within Agility. This accurate information allows your company's to offer special customer pricing, print pick and delivery tickets, or track orders.

Contact DMSi Software
