

Say hello to the future of computing: Software as a Service (SaaS) solutions. DMSi software offers industry specific software through an Application Service Provider (ASP) or hosted environment. This service simplifies technology, fixes IT costs and frees resources to focus on core business initiatives.

SaaS Solutions

By outsourcing, you literally eliminate hardware and software components from your business and let someone else worry about them. Servers and other related hardware and software reside at a remote, secure, expertly maintained "Data Center." All your workforce needs is a PC with an Internet connection to access the Data Center and perform regular day-to-day business.

SaaS Solutions Benefits

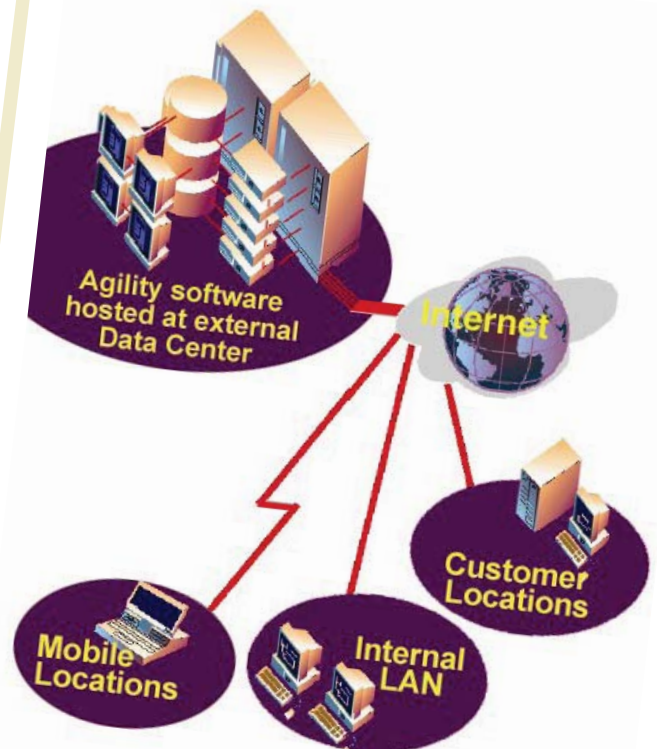

Through this pay-as-you-go plan, you'll no longer worry about how your IT network will grow when your business grows; the risk of obsolete technology; or the scarcity, expense and management of IT technicians. DMSi simplifies your life by planning, building and managing your infrastructure for you. You benefit from:

- Less up-front capital required - monthly usage fees let you pay for Agility as you profit from it
- Guaranteed security, back-up, disaster recovery and uptime
- No more expense and hassle of maintaining complex computing environments
- Reduced risk on technology investments

Who should work with a SaaS Solution?

Many types of business environments are well-suited to operating their business with SaaS Solutions. These business environments include:

- High Growth - If you are growing fast or starting a new business, there is little time to find staff, evaluate alternatives and gain expertise. You can move to a top-tier application now, rather than having to pass through an interim stage with make-do software as your business grows.
(continued on back)
- Mobile Workforce - Portable computing has made it easier

to take the job on the road. Now with Agility accessible through the Internet, your sales reps have access to a robust, secure data center 24 x 7 x 365.

- Changing Head Count - Reorganization, mergers and acquisitions place extreme demands on an IT infrastructure. Using a SaaS solution to deploy applications relieves the pressure on your IT staff to adapt existing systems to the new corporate landscape.
- E-Commerce - With the pay-as-you-go SaaS solution, integrating e-commerce is within reach. Up-front costs disappear allowing you to take advantage of new e-commerce initiatives, resulting in fast ROI from day one.
- Any Size Enterprise - The costs of expensive resources are spread across our entire customer base, lowering the cost of ownership. Industry specific software and functional expertise is now easy to obtain, making the SaaS solution a viable solution for both large and small companies.

Who's using SaaS Solutions?

"The decision to switch to SaaS Solutions from DMSi was a no-brainer. After replacing two obsolete mainframe computer systems for our company within a short amount of time, we see the hosted solution option as a great way to eliminate ongoing hassles of managing and updating technology."

~Linda Cole, Gannon Wholesale

"As the cost of IT staff steadily increase, hosted solutions help us drive our costs down, provide complete disaster protection and keep up with the latest technology. We don't even think about it," explains Joyce Hunt, Boston Cedar & Millwork controller. "And, it's great for our salesmen who are now able to access our database on the road ... wherever, whenever."

~Joyce Hunt, Boston Cedar & Millwork

"I love it! For our size company, it is ideal. I don't have time to be updating hardware and software. With SaaS, all the updates are kept current automatically."

~Judy Tlumac, Benbilt

"With Agility SaaS, I can access information anywhere – from home, when traveling, or even at Starbucks."

~Jim Michas, Stark Lumber

"By eliminating the need for on-premise servers, DMSi's Agility Software as a Service (SaaS) helped us stay focused to grow from entrepreneurial start-up to market leader."

~Van Isley, Professional Builder's Supply

"Despite transitioning from a complete paper run company when installing, we were running live after only three months after purchasing Agility. The SaaS model helped make the process easy."

~Chris Jones, Framing Square Lumber

"Selecting DMSi to handle our technology needs is one of the best decisions I have ever made."

~ Steve Chambers, Harper Chambers Lumber
