

**Your customers will have access to critical, secure information from your back-end application with PartnerView, 24 hours a day, seven days a week. A customer in tune to their account means your organization's sales team can explain less and sell more, saving time and money.**

PartnerView provides your customers with unlimited access to review products, pricing, and deliveries from your web site on their PC or mobile device. Together, you can save hours of work traditionally spent coordinating efforts.

In combination with DMSi StockNET catalog solution, PartnerView provides an image friendly gateway directly into your system. This powerful combination provides:

- Time savings. Real-time data empowers your customers and internal staff to handle more in less time.
- Cost savings. Electronic queries reduce overall account management expenses and ensure your staff and resources are utilized effectively. Plus, electronic information further reduces paper expenses.
- Improved accuracy. Integration into your current DMSi business management system offers new ability to examine orders and shipments. You will eliminate redundant searches and the chance for errors.
- Affordable access. Flexible controls without technical components make PartnerView the perfect choice for you and your customers. This application comes at a fraction of the cost of online order processing applications.

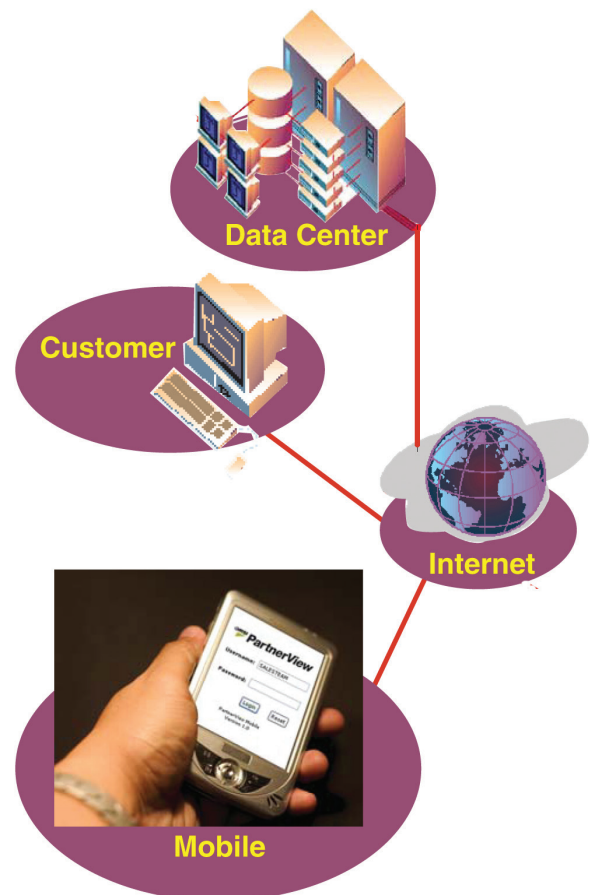

#### Utilize PartnerView to Find

- Items, products
- Quotes, pending quotes
- Order acknowledgements, open orders, pending orders, order dates
- Invoiced orders, paid invoices, applied payments
- Open credit and debit memos
- Transaction, PO, or reference numbers

### Online: A Practical Way to Extend Your Hours

PartnerView expands the business day by providing account details to prospects and customers - anytime day and night. Customers have better access to recent transactions, while you spend less time on customer service. In addition, PartnerView replaces toll-free calls associated with traditional transactions, lowering overhead costs.

### Reduce Administrative Work

Powerful drill-down options and robust search criteria - group number, product group, codes, keywords, characteristics and customer specific pricing information-help your customers locate information before they place an order or call to inquire about open orders, back orders, and more.

### Easy Set-Up, Secure Online Presence

Secure, advanced technology makes PartnerView easy for you to set up and maintain; and convenient for your customers to access. Windows-enabled controls offer navigation packed with feature-rich interaction, establishing a stronger business-to-business relationship with customers.

### Flexible eCommerce Solutions

Dynamic interaction with the suite of e-Commerce applications from DMSi is perhaps PartnerView's finest trait. The PartnerView portal works with StockNET to display full-color graphic catalogs. When you are ready to offer online order entry, an upgrade to a full version of PartnerView is simple. Dynamic interaction assures the ultimate buying experience with live information. Start connecting your business today with PartnerView.
